

PROTECTIVE FILMS

ADDEV Materials provides both temporary and permanent protective film solutions for your most difficult and challenging products. We offer high-speed converting technology with a wide range of recognized film manufacturers to bring you one of the largest portfolios of surface protection available. Our temporary protective films bring peace of mind. Protect your surfaces from scratches, abrasions, contamination during manufacturing and transportation, including storage.

We have a full offering of films that complement a very broad range of adhesion levels compatible with surfaces ranging from highly polished to highly textured. We provide you reliable protective films for your Class A solutions.
